EXPERIENCE / PROJECTS

Smarter Click — *Junior Front End Developer*

JULY 2019 - PRESENT

- Part of a team of seven developers maintaining and building new features for the main tag, which sees billions of impressions every year across client's websites
- Helped to create a dashboard which saved our client several labour-hours per day. This case study has acted as an excellent tool for the company when pitching the product to new clients. Built with React, Redux, TypeScript
- Implemented tests with react-testing-library to allow for faster, safer feature development on the dashboard

ONE-MENU — *Web Developer Internship*

JUNE 2018 - AUGUST 2018

- Responsible for the creation of the front-end of the new ONE-MENU website with Gatsby
- Trusted to solve complex problems independently
- Gained invaluable professional experience as a Web Developer, learning a lot about collaboration and working as part of a team

GymTracker — *Personal Project*

github.com/billylevin/gymtracker

- Full stack meal and exercise planning app, built with NextJS, GraphQL, Apollo, Express, TypeORM, and TypeGraphQL
- User authentication with sessions and cookies
- Structured as a monorepo using Yarn workspaces for easy full stack development
- Deployed to DigitalOcean using Docker

OPEN SOURCE

- Code contributions to Svelte
- Small fix to kentcdodds.com

I plan for this list to continue growing!

SKILLS & TECHNOLOGIES

- HTML / CSS / SCSS
- JavaScript
- TypeScript
- React / Gatsby / Next
- Redux
- Node.js / Express
- GraphQL
- Version Control
- react-testing-library
- Svelte
